BENT GRASS BLEND

FEATURED BENEFITS

- ☑ Features True Putt technology; While other putting greens are tufted with the yarn stitched in a straight row, True Putt technology inserts the yarn tufts with a non-directional method. Straight row tufting affects the speed and straightness the ball rolls when rolling with or across the rows. With True Putt the ball rolls the same in any direction on the surface resulting in the truest roll available.
- ☑ Embossed rubber stabilizing pad; The embossed rubber attached backing stabilizes the product keeping it flat wrinkle free. In addition adds a softer more natural feel with walked on.
- ☑ Controllable putting speed; Product can be adjusted to reach Stimpmeter speeds up to 12.
- ☑ Natural Color; Tone on Tone 2 color effect matches the color of real grass.
- ☑ Nylon Fiber; Nylon fiber texture offer the best surface for ball roll.
